Welcome

The Australian Curriculum, Assessment and Reporting Authority is responsible for the development of a national curriculum, assessment and reporting program.

ACARA's work is carried out in collaboration with state and territory principals, governments, State and Territory education departments, community groups and the general public.

This website outlines the work of ACARA in the development of an Australian curriculum, assessment and reporting program.

To view the Australian Curriculum, the Assessment and Reporting Program click on the quick links below.

News Just In

The Shape of the Australian Curriculum: Languages directions for the development of languages from Year 6 to Year 10 commence, starting with F-10 Chinese and F-10 Indonesian languages.

Welcome to the Australian Curriculum online

The Australian Curriculum sets out the core knowledge, understanding, skills and general capabilities important for all Australian students. The Australian Curriculum describes the learning entitlement of students as a foundation for their future learning, growth and active participation in the Australian community. It makes clear what all young Australians should learn as they progress through schooling. It is the foundation for high quality teaching to meet the needs of all Australian students.

Developing the Australian Curriculum

The Australian Curriculum is being developed progressively. The Foundation to Year 10 Australian Curriculum for English, mathematics, science and history is now available. This includes curriculum content supported with elaborations; and achievement standards supported with work samples. The achievement standards will be subject to validation in 2011.

The rationale, aims, content descriptions and the achievement standards published on the Australian Curriculum website in December 2010 were displayed as v1.0 of the curriculum. In January 2011 there was a change to the glossaries for some of the learning areas and this change was noted by a change to version 1.1.

Guided tour

Curriculum

Curriculum

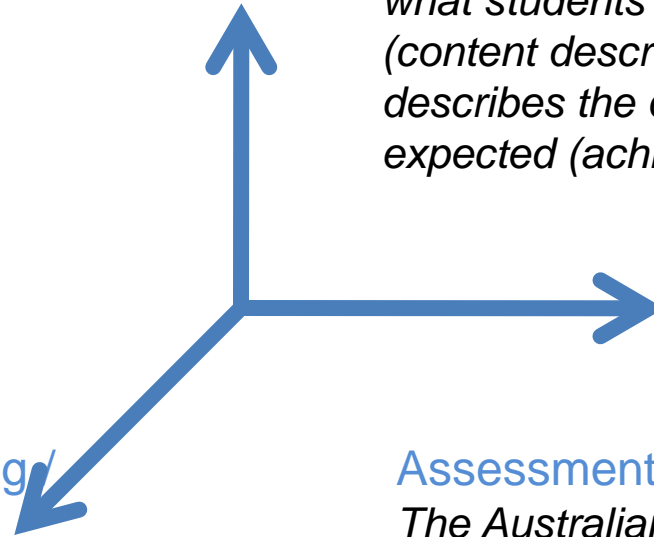

The Australian Curriculum details what students should learn (content descriptions) and describes the quality of learning expected (achievement standards)

Assessment

The Australian Curriculum does not specify how teachers / schools / curriculum authorities will assess student learning

Organisation of learning/ pedagogy

Schools and teachers are best placed to decide how to organise learning, taking account of the needs and interests of students and school context

Dimensions of the Australian Curriculum

Learning areas

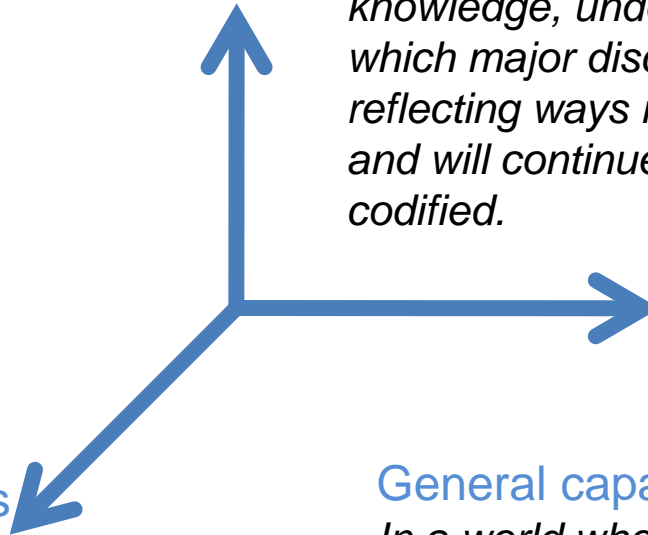

The Australian Curriculum will be designed to ensure that students develop the knowledge, understanding and skills on which major disciplines are based; reflecting ways in which knowledge has and will continue to be developed and codified.

General capabilities

In a world where knowledge is constantly growing and evolving students need to develop skills, behaviours and dispositions that apply across subject areas; equip students to be lifelong learners.

Cross-curriculum priorities

Special attention to three contemporary issues.

Australian Curriculum aligned resources

Scootle has made finding and using resources aligned to the Australian Curriculum as easy as 1, 2, 3 ...

1. Browse the Australian Curriculum down to the curriculum content description.
2. Explore the resources that are matched to the curriculum content description.
3. Add content descriptions and relevant resources to your learning paths.

My Place for Teachers

Education Services Australia in collaboration with Australian Children's Television Foundation has launched stage 2 of the education website **My Place for Teachers** at www.myplace.edu.au. The website complements *My Place* (series 2) now running on ABC3.
